Natural All Stages Plant Fertilizer

ROOT PRODUCTION

VEGETATIVE DEVELOPMENT

FRUITING

FLOWERING

Net Content: 8 oz. (0.24 l)
Net Density: 0.52 lbs

0.01-0-0.01

TAPPIN'ROOTS is intended to provide support for optimal plant development. Our unique formulation of naturally processed wild ingredients has been a mainstay of horticulture in Northern California for decades. Now this magical elixir comes to you!

Farmers understand that large, vital plants need strong root systems. Our natural fertilizer is designed to help your plant through all growth stages, from rooting to flowering, using knowledge gained from natural systems.

When fed as directed, **TAPPIN'ROOTS** may encourage foliar growth and support natural plant functions. Our goal is to help you grow the largest, highest-quality plant you ever thought possible!

Directions:

Feed alone or add to existing regimen.

Shake well.

Growth Stage	Recommended Usage
Cuttings	6-8 tsp/gal
Seedlings	6-8 tsp/gal
Vegetative	6-8 tsp/gal
Flowering	8-10 tsp/gal
Foliar Spray	6-8 tsp/gal

Guaranteed Analysis:
Total Nitrogen (N) 0.01 %
0.01% Water Soluble Nitrogen
Soluble Potash (K20) 0.01 %
Calcium (Ca) 2 %

Derived from: Kelp Extract and Willow Extract
